Apollo®

Traditional

Proximity Wear

Surviva-Fire® Coverall  
Specially designed for fire grass and bush fire fighter that needs breathing protection. Guaranteed flame resistant for the life of the garment.

Bhulumilo®  
Fire-Safe® Coverall  
A comfortable and cool FR cotton/HTN (80/12 blend) work wear garment that is guaranteed flame resistant for the life of the garment. Used in a variety of applications as a daily work uniform to protect against the hazards of welding, electrical arc, flash fire, wildland firefighting, rescue work and military applications. Preferred fabric to the petrochemical industry.

### Apollo® (Kermel® HTA) and Hestia® (Nomex®) Bunker Suits

Light weight suit with shorter bunny jacket designed for extra mobility. 3 Layer construction - outer shell and liner consisting of thermal and moisture barriers. Liner can be permanently attached or removable. moisture barrier seams are all sealed and totally liquid proof.

**Jacket:** Zip and Velcro front closure, extension gusset under the arm and back (plates for complete freedom of movement), two large expansion pockets with Velcro closure plus one internal waterproof pocket, extra large throat tab with Velcro closure, leather on cuffs, lined wrist with thumb loop.

**Trouser:** Waist high trouser with 70mm increased back area; stitched 50mm elastic and adjustable heavy woven cotton braces; Velcro frontal closure; 2 side hip expansion pockets to fit gloves and huckdavis; leather on leg cuffs.

**Optional:** Various options are available: fixed or detachable liners; single or double rows of reflective tape; leather on elbows, knees and shoulders; radio pocket; cell phone pocket; torch strap and pouch; lettering.

### Traditional (Kermel® HTA)

Traditional suit with 93cm long coat and shorter trouser back.

Only the best certified lightweight materials available are used in the manufacture of these fire fighting suits. Special attention is given to wearer comfort.
